

### Features

- Standard X-750 Inconel diaphragm for strength, corrosion resistance and longer life.
- Three seat material choices for a wide range of chemical compatibility, (PEEK, CTFE, and Vespel).
- High maximum supply pressure of 6000 PSIG to allow more through put of gas.
- Tamper Proof option available.
- Ambient Temperature range of -40°F to +500°F, depending on seat material.
- Panel Mounting option available.

### Operating Principles

When the regulator is adjusted for a specific set point, the downward force of the Range Spring moves the Diaphragm Assembly downward. The Supply Valve opens and allows air to pass to the Outlet Port. As the set point is reached, the downward force of the range spring is balanced by the force of the downstream pressure that acts on the diaphragm, causing the supply valve to close.
