Rotork Fairchild’s High Pressure - Pressure Reducing Regulator is suitable for 690 bar (10000 psig) inlet and outlet hydraulic and pneumatic applications.

Tapped exhaust port allows for convenient capture of vented media. Age hardened stainless alloy seat provides a unique combination of ultra high strength, toughness, and outstanding corrosion resistance. Zirconia oxide ceramic ball provides high strength and excellent wear resistance to provide a reliable, long-lasting unit in harsh applications.

Applications
- Wellhead Control Panels (WHCP)
- Topside and Subsea valve actuation
- Component testing
- Hydraulic Power Units (HPU’s)

Features and Benefits
- Cartridge-style service insert allows quick change of the main valve and filter without removal from control panel or process lines thus preventing damage to fittings or regulator port threads
- Internal 40µ supply filter protects equipment from contamination at high differential pressures
- Ceramic main valve for severe service application, superior performance and enhanced product durability
- NACE compatible design
- High impact knob
- Piston-sensed design ensures safety and reliability
- Segregated captured vent for control of relief media
